Enterprise synopsis

The Zhejiang pair sub-machine manufacture the Limited company is in a US the far corporate investment domestic Sole-source investment enterprise, registered capital 2,500,000 US dollars, area 6716m², floor space 11800m², total investment 5,000,000 US dollars. Is established in November, 2007, is a specialized design, the manufacture, the installment drugs manufacture equipment, the biochemistry equipment, the young food equipment, the environmental protection equipment, the hygienic level fluid pump valve in a body' s high technology and new technology enterprise.

Company existing mature product: Crystallizes the equipment, the evaporation concentration equipment, to withdraw the equipment, the filter plant, the vessel class equipment, products and so on pump valve fluid fitting. Presently with emphasis researches and develops: Crystallization, concentration, dry and so on domain high-tech products, absorbs the domestic and foreign advanced technical technology, careful making domestic famous brand. The company may provide the engineering design, for the user equipment setup services and so on debugging, and provides hands over the key project.

The company has the advanced import welding and the precision work equipment: Plasma cutter, plasma argon arc welding machine, CAM numerical control machining center and so on overseas sophisticated equipment.

The company insisted road of the technical, entrusts with heavy responsibility the high quality, the high most advanced technique talented person, the strengthened enterprise internal management, the optimization product mix, absorbs the overseas mechanical profession unceasingly the advanced technical technology. “creates the first-class brand, constructs hundred year enterprise” is the pair of sub-person’ s pursue goal, the double sub-enterprise hopes by the first-class technology, the first-class product, the first-class service and the domestic and foreign colleagues cooperates hand in hand, for domestic and foreign professions and so on drugs manufacture, biochemistry, young food, environmental protection provides optimized together the equipment and the most perfect service tries hard.
